Acne Program

A Lime Spa Certified Acne Specialist can help you achieve clear skin in as little as three months. Your Acne Specialist will analyze your skin and type of acne and will design a product and treatment regimen designed to get you clear.

ACNE CONSULTATION

In your consultation, we determine your skin type, acne type and skin tolerance, give you recommendation for the products and treatments you will need to get you clear, go over aggravating factors that make you break out and give you a packet of information that has everything we tell you during the consultation.

30 minutes - \$50

ACNE CONSULT AND TREATMENT

In your consultation and treatment, we do a thorough consultation and perform an acne exfoliating treatment with extractions.

75 minutes - \$125

ACNE TREATMENT

We will want to see you every two weeks for an acne treatment. It typically takes about six to eight treatments over a 3 to 4-month period of time to get you mostly to completely clear. Your Acne Specialist will assess what type of treatment your skin needs, assess how your home care regimen will be adjusted so that your skin does not over-adapt and stop responding
